The following is an examiner's statement of reasons for allowance: Sadatoshi et al. (US 6,087,443) is the closest prior art. However Sadatoshi et al. neither alone nor in combination with any other reference (including those cited with this Office action on PTO-892) does not teach or suggest applicants' combination of ranges of melt flow rates, viscosities, monomer concentrations and amounts of peroxides for treating applicants' components "A" and "B".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
